All, Katharine Lima with CSC is helping me with technical support. She identified the lack of data forms and validated data for the majority of the dissolved metals results from surface water sampling information Megan sent me on CD, which I forwarded to CSC. Barry is trying to help me out, but I want to be sure that START can find and forward to me ASAP all the dissolved metals data for ALL aqueous samples collected. Also, please confirm that they were validated and forward those reports.

I apologize if I have this somewhere, but I cannot locate it in what Megan sent me.
